Dear WTPS Community,

In light of recent concerns that have been raised regarding safe drinking water in our towns and schools, I requested that the water in all of our schools be tested. I was particularly interested in ensuring that we did not have elevated levels of lead.

Water samples were collected by the Wall Township Public Works and then submitted to Brick Utilities for analysis. I am pleased to inform you that the results revealed that the both lead and copper levels are below the NJ Environmental Protection Agency Action Goal Levels.

There is legislation pending in the New Jersey Senate, introduced by Senators Sweeney and Ruiz, which would mandate all public schools to test drinking water for lead. In addition, the Senators called upon Commissioner of Education, David C. Hespe, to require public schools to immediately test the drinking water for the presence of lead; notify parents or guardians of children attending each school of the test results; and, if needed, take steps to provide an alternate drinking supply.

As Superintendent of the WTPS, I felt that it was important to take these steps and not wait for a mandate or directive from the Department of Education. The full results of the testing are available for your review on the district website.

I hope that you begin to enjoy spring weather as we move into the final months of the school year.

Best wishes,

Cheryl Dyer

Wall, NJ 07719

RE: Wall Township Schools Water Testing

Dear Mr. Romano,

On March 24th, 25th, 28th and 29th of 2016, Wall Township Public Works collected water samples from all seven schools in Wall Township including Wall High School, Wall Intermediate School, West Belmar School, Old Mill School, Allenwood School, Central School, and Primary School. The samples were submitted to Brick Utilities to analyze levels of lead and copper. The guidelines for lead and copper provided by the NJ EPA are measured in Parts per Million and Brick Utilities measures in Parts per Billion. To standardize the test results, I am converting the Brick Utilities' Parts per Billion action goal and action level to the NJ EPA action goal and action level. Below are the results of the testing per school. Attached are the results of the analysis performed on the water samples submitted to Brick Utilities on March 30, 2016.

EPA Lead Action Goal is .005ppm and Action Level is .015ppm

Schools	Sample Results(ppb)	Sample Conversion(ppm)
1. Wall High School	.75	.00075
2. Intermediate	<.50	<.00050
3. West Belmar	1.02	.00102
4. Old Mill	<.50	<.00050
5. Allenwood	<.50	<.00050
6. Central	1.61	.00161
7. Primary	1.91	.00191

EPA Copper Action Goal is 0ppm and Action Level is 1.3ppm

Schools	Sample Results(ppb)	Sample Conversion(ppm)
1. Wall High School	55.29	.05529
2. Intermediate	10.04	.01004
3. West Belmar	108	.108

4. Old Mill	6.44	.0064
5. Allenwood	154.20	.15420
6. Central	30.87	.03087
7. Primary	32.73	.03273

As a result of the water sampling, it is safe to say both Lead and Copper Levels are below the NJ EPA Action Goal Levels. Going forward we will be putting into place Water Sampling for all seven schools, twice a year during the months of February and August.

If you have any questions or concerns please don't hesitate to contact me.

Dear Mr. Langel:

Attached is the result of analysis performed on the sample submitted to Brick Utilities on March 30, 2016, lab #16033003. All QC criteria were met for the sample.

Thank you for choosing Brick Utilities Laboratory. If you have any questions, please don't hesitate to contact me.

Respectfully,

Stephen Naglich
Water Quality Supervisor
